

# Using Our Catalog

It's all in the details. Everything offered in this catalog has been extensively tested by our product experts. Our team meticulously gathers details from our product trials to ensure we're offering only the best varieties. From yield data to disease resistance, and flavor descriptions to comparisons between similar varieties, our goal is to give you everything you need to choose the right seeds for your farm or garden.

## PRODUCT DESCRIPTION KEY

**Adam Gherkin (F1) (A) 2563G 47 days. *Cucumis sativus***

**IR: CMV, PM, S.** ————— **Disease Resistance Codes**

**High-quality European pickler.** Adam Gherkin produces high yields in a broad range of climates. Fruits are covered in tiny spines for a true "cornichon" look. Nicely proportioned even at 2–3". Suitable for field or greenhouse. Gynoecious and parthenocarpic. **CG**   
 PKT \$6.35; 250 Seeds \$23.85; 1,000 Seeds \$77.05;  
 5M @ \$73.83/M; 25M @ \$67.94/M.

**Product Features**

Find each disease code key within the crop's growing information:

### Growing Cucumbers *Cucumis sativus*

**Disease Resistance:** **HR** = High Resistance **IR** = Intermediate Resistance

**A** Anthracnose **B** Bacterial Wilt  
**ALS** Angular Leaf Spot **CMV** Cucumber Mosaic Virus

For full list of cucumber disease resistances, see page 29

## TERMINOLOGY

**Developed by Johnny's:** New seed varieties, tools, and supplies introduced after careful years of work and evaluation by Johnny's traditional plant breeders or product experts.

**Certified Organic:** Seeds harvested from, or plant material grown, harvested, stored, and handled under the guidelines and laws required by the USDA National Organic Program (NOP) and the Code of Federal Regulations.

**Certified Naturally Grown:** Verified to meet high standards for ecological production through a peer-review process. All standards are detailed at Naturallygrown.org.

**Hybrid (F1):** The offspring of a cross between two genetically distinct parent lines. Hybrid varieties are selected for traits such as improved flavor, disease resistance, fruit quality, yield, and climate adaptability. An (F1) hybrid refers to first filial or first-generation offspring of the cross. Seed saved from an F1 hybrid will not produce plants with characteristics equivalent to the F1 hybrid.

**Open Pollinated (OP):** Non-hybrid variety that can reproduce itself in kind, with relatively stable traits from one generation to the next. Seeds saved from open-pollinated varieties produce plants very similar to their parents.

**Heirloom:** Open-pollinated variety whose seed lines have been maintained by gardeners and farmers over generations, prized for traits such as appearance, fragrance, and flavor.

**Conventional:** Not certified organic.

**Pelleted:** Covered with a coating that improves the shape, size, and uniformity of raw seeds for more accurate sowing by hand and machine.

**Treated:** Fungicidal coating that protects seeds from soilborne pests or pathogens during seeding and germination. Our treated seeds are neonicotinoid-free. All treated products have a "T" at the end of the part number.

**Untreated:** Seeds that have no chemical treatments. All seeds offered by Johnny's are untreated unless otherwise noted.

## ABBREVIATIONS & SYMBOLS

-  Developed by Johnny's
-  Certified Organic
-  Certified Naturally Grown
- (F1)** Hybrid
-  Heirloom
- (A)** Annual
- (P)** Perennial
- (TP)** Tender Perennial
- (B)** Biennial
- (A/P)** Annual & Perennial Mix
-  Available at Johnnyseeds.com
-  Heat Tolerant
-  Cold Tolerant
-  Greenhouse Performer
-  Hydroponic Performer
-  Grows Well in Containers
-  Easy Choice
-  Hanging Basket Suitable
-  Cut Flower
-  Dried Flower
-  Edible Flower
-  Highly Fragrant
-  Attracts Beneficial Insects

## AWARDS & CERTIFICATIONS

**All-America Selections (AAS)** awards are given to new, top-performing varieties based on trialing results by this independent non-profit organization.

**FleuroSelect Awards** are given to ornamental varieties based on high performance, use, innovation, and beauty based on trialing performed by this international organization.

**Organic Materials Review Institute (OMRI)** lists items allowed for use in certified organic operations under the USDA National Organic Program.
