Growing Pac Choi/Bok Choy

Brassica rapa var. chinensis

Culture: Sow from early spring through midsummer. In the South, pac choy is well adapted for fall plantings.

Days to Maturity: From emergence after direct seeding.

Transplanting: Start seeds in 128 or 72-cell trays, 2-4 weeks before transplanting. Plant out before seedlings become rootbound or stressed to prevent premature bolting.

Direct Seeding: Sow 15 seeds/ft., 1/4" deep in rows 4-12" apart, depending on the variety. Thin plants as recommended in our Pac Choi Comparison Chart.

Avg. Direct Seeding Rate: For bunching: 830/oz., 13,000/lb. at above spacing.

Insect Pests: Flea beetles can be controlled by covering with floating row covers from day of sowing.

Harvest: Harvest before flowering.

Seeds/Oz. (Avg.): 10,300. **Packet:** 250 seeds, sows 16' full-size.
